

WALL & CORNER PROTECTION SYSTEM

HAND RAILS & WALL GUARDS

ROHS CERTIFIED

FIRE RETARDANT

ANTIMICROBIAL REPELEENCY COATED

There are some wall **guards** options available in a variety of standard and **custom wood species** and finishes which offers maximum protection against wheelchair, cart and furniture impacts. Gently curved upper edge helps prevent injury from accidental falls, discourages use as a footrest and eliminates litter and dust buildup. Heavy-gauge aluminum retainers and the industry's heaviest rigid Vinyl covers are used. Color option is available as per **RAL shades** with some certain quantity.

We have few models of handrails for hospitals and care house, they are essential in rehabilitation areas, in hospitalization halls or in care house where people need additional support. The elderly appreciate the warm touch of the plastic against the metallic cold of the handrails.

- ▶ The **rigid vinyl** shall not support fungal or bacterial growth
- ▶ The system shall resist an impact load
- ▶ The system shall also conform to class A **fire rating** and for **chemical and stain resistance**.
- ▶ High accent strip available in various **custom colors, several pattern** and finish options
- ▶ Easy installation, clean-up and maintenance
- ▶ All mounting fasteners are included with each order

WALL GUARD & HAND RAILS DESIGN OPTIONS

WT-WG-100 SERIES
